# FOREIGN CROPS AND MARKETS

ISSUED WEEKLY BY  
UNITED STATES DEPARTMENT OF AGRICULTURE  
BUREAU OF AGRICULTURAL ECONOMICS  
WASHINGTON, D. C.

Vol. 37

November 12, 1938

No. 20

## LATE CABLES . . . . .

Finland 1938 crop estimates placed as follows, with 1937 comparisons in parentheses: Wheat 7,973,000 bushels (7,665,000), rye 14,684,000 (16,982,000), barley 9,140,000 (8,082,000), oats 56,286,000 (49,915,000) potatoes 48,501,000 bushels (50,979,000). (International Institute of Agriculture, Rome.)

Lithuania 1938 estimates of specified crops reported as follows, with 1937 comparisons in parentheses: Potatoes 75,985,000 bushels (92,223,000), flaxseed 1,181,000 bushels (1,401,000), flax fiber 57,320,000 pounds (69,082,000). (International Institute of Agriculture, Rome.)

Iraq 1938 wheat production estimated at 24,434,000 bushels and barley at 28,798,000 bushels as compared with 21,311,000 and 26,180,000 bushels, respectively, harvested in 1937. (International Institute of Agriculture, Rome.)

Egypt revised estimate of cotton production in 1938-39 places crop at 1,523,000 bales of 478 pounds net compared with final estimate for 1937-38 of 2,281,000 bales. (International Institute of Agriculture, Rome.)

Northern Brazil cotton crop for 1938-39, second official estimate, 633,200 bales of 478 pounds net compared with second estimate, for 1937-38 of 868,500 bales and final estimate of 707,600 bales. (United States consulate general, Rio de Janeiro.)

## IN THIS ISSUE . . . . .

Argentine Grain Prospects Good

On the basis of the acreages sown to wheat and flaxseed in Argentina, with average yields and normal abandonment, the 1938-39 crops will be materially higher than last year and probably above average, according to Acting Agricultural Attaché C. L. Luedtke at Buenos Aires. In 1937-38, only 185 million bushels of wheat and 61 million bushels of flaxseed were produced, which compare with the 5-year averages of 232 million and 68 million bushels, respectively. Weather conditions have been generally favorable in the wheat and flaxseed zone during the past month. Light frosts were reported in southern districts during the week ended October 24, but the grain was not sufficiently advanced to suffer any damage. Early seedings of corn benefited from recent scattered rains, and it is expected that the acreage planted this year will be slightly larger than that of 1937-38, officially estimated at 15,318,000 acres.

Italian Rice Crop Affected by Unfavorable Weather

Cold and rainy weather during September and early October was unfavorable for maturing and harvesting the Italian rice crop, according to a recent report received from Vice Consul Perry Laukhuff at Milan. Carry-over of old rice at the end of the marketing year, September 15, was very small and, because of active demand and retarded arrivals of new-crop rice, premiums of as much as 5 cents per 100 pounds above the official price were being offered.

The 1938 Italian rice crop, according to a preliminary estimate announced in September, was officially forecast at 33,640,000 bushels. This compares with 32,638,000 bushels, officially forecast on approximately the same date last year for the 1937 crop. The 1937 production, however, according to the National Rice Growers' Association, amounted to approximately 38,220,000 bushels, as the Association was reported to have received 36,271,000 bushels. The 1938 rice acreage was officially estimated at 347,000 acres, compared with 344,000 for the 1937 crop.

The Government has been increasing its control over the rice industry. The Ministry of Corporations issued new orders in September regulating the marketing and prices of rough and milled rice for the new crop. As in past years, the control will be exercised by the National Rice Growers' Association. Prices paid to farmers for the new crop of rough rice are to be 5.4 cents per bushel above those of last year. The bounties to be paid on exported rice for the October-December quarter have been fixed at from 60 to 74 cents per 100 pounds, depending upon the grade of milled rice.

Italy has been maintaining rice production at a high level during recent years but has had difficulty in maintaining exports. At the present time, about 33 percent of the crop is exported, compared with an average of 46 percent during 1926-1930.

Japan Cotton Imports Large During September

Raw-cotton imports into Japan during September amounted to 474,927 bales, compared with 177,606 bales the previous month and 128,459 in September of 1937, according to a radiogram received from the Shanghai office of the Bureau of Agricultural Economics, quoting American Consul Walter P. McConaughy at Osaka. The increase in imports, according to the message, does not indicate any change in the Government's policy of controlling cotton imports, and observers are not enlarging their estimate of the total cotton imports for the 1938-39 crop year. The high figure for September is believed the result of imports arriving at the same time from a number of permits granted at various dates over the past 2 to 4 months.

Total Japanese cotton imports for the 1938-39 crop year (September-August) have been estimated by the Shanghai office at approximately 2,400,000 bales. This compares with 2,055,000 bales imported during 1937-38 and the 5-year average of 3,672,000 bales for 1932-33 to 1936-37.

Total.....	518,248	123,413	134,799

Estimates from trade sources in Japan.

Consumption of raw cotton in Japan remained practically unchanged. Little variation in yarn production is expected under the present strict Government regulations, and there is not much prospect of a change in the near future. During September, production of pure cotton yarn amounted to 206,332 bales (of 400 pounds) and 10,328 bales of mixed-cotton and staple-fiber yarn, compared with 350,000 bales of pure cotton yarn and no mixed yarn in September a year ago.

Cloth exports from Japan during September amounted to 178,844,000 square yards, compared with 253,701,000 in September 1937. Exports of cotton goods to the yen-bloc countries continued to be made at higher prices than those quoted to other countries. A complete embargo on shipments to the yen-bloc areas, as was indicated some months ago, has not been entirely enforced.

The link system, whereby exports of cotton piece goods must furnish the exchange for raw-cotton imports, may not stimulate cotton-cloth exports to the extent hoped, but it has facilitated the granting of exchange permits for raw cotton. A liberalization of regulations under the link system, permitting a period of 4 months instead of the former 3 months, is expected to improve export conditions for cloth.

#### Foreign Raisin Production Larger

This season's raisin crop in the chief foreign producing countries is estimated to be about 29 percent larger than in 1937, according to a report prepared by the Paris office of the Bureau of Agricultural Economics. Production in 1938 is forecast at 250,400 short tons, compared with 177,100 tons in 1937 and 185,700 tons for the 1929-1936 average. Crops in the major producing countries, with the exception of Australia, are reported lower in quality than usual.

RAISINS: Estimated production in major producing countries, 1938, with comparisons

Country	Average 1929-1936	1936	1937 preliminary	1938 forecast
	Short tons	Short tons	Short tons	Short tons

a/ Revised. b/ Based chiefly on exports. c/ Figures of California Co-operative Crop Reporting Service. d/ Not yet available.

The market outlook in Europe this season, particularly with regard to United States raisins, appears less favorable than a year ago. In the United Kingdom, heavy purchases from the large Australian crop will displace United States raisins to some extent. The French demand probably will not be so large as it was last year because of the present relationship of the franc to the dollar. On the other hand, the Scandinavian countries, Belgium, and the Netherlands are expected to import about the same quantity, possibly a little more.

#### Sicilian Crop of Winter Lemons Slightly Larger

The Sicilian winter-lemon crop is expected to be slightly larger than last year, according to a report prepared by the American vice consul at Palermo, Italy. In the Province of Messina, the main producing region, the yield of winter lemons is expected to be from 25 to 30 percent larger than last season. The fruit in general is of good quality but small.

In the Province of Catania, however, some damage was done during the earlier part of the season by strong winds, which blew large quantities of blossoms and small fruit from the trees. The crop in the Province of Palermo also suffered to some extent from unfavorable growing conditions.

#### British Wool Markets Firm and Active

The late October firmness in primary wool markets has been reflected in the British market, according to Consul E. E. Evans at Bradford. The large clearances in Australia have been an especially important factor. Germany and France have been large buyers, supported by Bradford and Australia mills. Japanese buyers were chiefly active in cross-bred material, with some American interest being shown in the finer qualities. Makers of semimanufactures have encountered some difficulty in obtaining prices commensurate with current raw-wool values, but the general tone of the trade is against recessions.

#### South America has Slightly Larger Wool Clips

The 1938 Argentine wool clip amounts to about 375 million pounds, according to preliminary estimates transmitted by the Buenos Aires office of the Bureau of Agricultural Economics. The current figure, compiled by the local branch of the First National Bank of Boston, is somewhat in line with the clips of other recent years. In Uruguay, preliminary estimates indicate a clip equal to, or slightly larger than, that of last year. The South American wool-marketing season begins October 1.

#### German Hog Numbers

The German hog census figures of September 3, 1938, forwarded by the Berlin office of the Bureau of Agricultural Economics indicated a

continued decline from the high levels of September 1936. At 23,318,000 head, they were 5 percent below the average for the past 8 years and 8 percent below the 1937 total. The reduction from last year's figures was particularly noticeable in the young stock, suckling pigs 5 percent and light-weight slaughter pigs 11 percent.

An indication that the low point may have been reached in hog numbers in Germany is seen in the considerably larger number of young sows. Though there was a 1-percent reduction in the number of older sows this fall compared with last, the 22-percent increase in young sows resulted in a total figure for sows 3 percent above that for 1937.

UNITED STATES AGRICULTURAL TRADE, JULY-SEPTEMBER 1938

United States foreign trade in agricultural products for the first quarter of the current fiscal year was marked by a 10-percent increase in farm exports and a 43-percent decrease in competitive farm imports.

Exports of grains, feedstuffs, fruits, nuts, meats, oilseeds, most of the vegetables, cornstarch and corn flour made important gains. Corn was greater by 36 million bushels, wheat and flour by 14 million bushels, lard by 18 million pounds, and cured pork by 7 million pounds than in the corresponding 3 months of 1937. Smaller purchases by the principal European markets reduced exports of cotton to 834,000 bales, or 194,000 bales less than last season. Some of the vegetable oils also dropped off.

Exports of grains and grain products were more than double those of a year ago and for the first time since 1931 rose above the prewar level.

UNITED STATES AGRICULTURAL TRADE, JULY-SEPTEMBER 1938, CONT'D

Fruits and tobacco were also above the 1909-1913 average. Reflecting the good crops of 1937 and 1938, exports of cured pork and lard continued to improve.

UNITED STATES: Summary of foreign trade, July-September, 1936-37 and 1937-38

Agricultural products	1936-37	1937-38	Percentage of increase or decrease
	1,000 dollars	1,000 dollars	Percent
Domestic exports.....	172,278	189,735	+10

Principal non-competitive.....	166,213	111,120	-33

Compiled from official records of the Bureau of Foreign and Domestic Commerce.

Imports of eggs, livestock, meats, feedstuffs, fruits, grains, and the important vegetable oils were much below those of a year ago. Hides and skins were less by 23 million pounds, soybean cake and meal by 18 million pounds, coconut oilcake and meal by 22 million pounds, canned beef by 8 million pounds, dutiable wool by 10 million pounds, and canned pineapple by 5 million pounds.

# FOREIGN CROPS AND MARKETS

---

ISSUED WEEKLY BY  
UNITED STATES DEPARTMENT OF AGRICULTURE  
BUREAU OF AGRICULTURAL ECONOMICS  
WASHINGTON, D C

STATISTICAL SUPPLEMENT  
UNITED STATES FOREIGN TRADE IN AGRICULTURAL PRODUCTS, 1937-38

November 16, 1938

Supplement to issue of  
November 12, 1938

Vol. 37, No. 20

- - - - -  
 STATISTICAL SUPPLEMENT ON  
 UNITED STATES FOREIGN TRADE IN AGRICULTURAL PRODUCTS, 1937-38

The detailed analysis of United States foreign trade in agricultural products, which in former years appeared with the following annual tables, was issued this year on August 24, with the preliminary tables on trade in principal agricultural products. That analysis is not included, therefore, in the present statistical supplement which gives the details of foreign trade of the United States in all agricultural products. Copies of the August 24 supplement containing the analysis are available on request.

UNITED STATES: Annual index numbers of volume of agricultural products  
 exported, 1929-1938 a/  
 (1909-10 to 1913-14 = 100)

Year ended June 30	All commod- ities	All commod- ities except cotton	Cotton includ- ing linters	Tobacco unmanu- factur- ed <u>b/</u>	Fruits	Wheat includ- ing flour	Grains and grain prod- ucts	Cured pork <u>c/</u>	Lard

1938 Prel.	2,331	1,155	567	588	50.9	25.2

Compiled from Monthly Summary of Foreign Commerce of the United States, June issues, and official records of the Bureau of Foreign and Domestic Commerce.  
a/ Agricultural products are general imports through June 30, 1933, excepting wool, where imports for consumption have been used in order to show the degree of competitiveness.  
b/ Excludes distilled liquors and forest products. Corrected to October 31, 1938.

AGRICULTURAL PRODUCTS: Exports (domestic) of the United States,
